Southern Wholesale Company
14 Douglas Street
Rome, GA 30161

To Whom It May Concern:

This letter is being sent to you to confirm that the soil removal activities performed on behalf of Exxon Mobil Corporation (ExxonMobil) at the VCC Rome Site have been conducted in accordance with USEPA requirements. All impacted soils have been removed from the Site to the extent practical. In some cases, the impacted soil could not be removed due to restrictions associated with sloping, existing features (railroad, roadways, sewer lift station, etc.), or utilities. These soils do not at present pose a risk to human health. A demarcation liner consisting of orange construction fencing was placed at the base of the excavations where impacted soils remain to serve as a visual indicator of the limits of the excavations to persons that may perform future subsurface work. In the event that these soils become accessible in the future, USEPA may request that ExxonMobil return to the Site to remove these materials and restore the property to the extent practical. If you have any questions regarding this letter, please contact me at 404-562-8743.

Sincerely,

A handwritten signature in black ink, which appears to read "Alyssa Hughes", is positioned above the printed name.
